About the Indiana Cancer Consortium

The Indiana Cancer Consortium (ICC) is a statewide network of public and private organizations working to reduce the cancer burden in Indiana. The ICC is an unincorporated association of organizations that implement the Indiana Cancer Control Plan 2005-2008. The Indiana Cancer Control Plan provides a framework for action to reduce the burden of cancer in Indiana. The ICC seeks to increase cancer prevention activities; increase early detection of cancer; decrease barriers resulting in disparities of access, screening, and treatment; and increase quality of life for cancer patients through increased communication and collaboration of ICC member organizations. Please visit our Web site at www.indianacancer.org.
